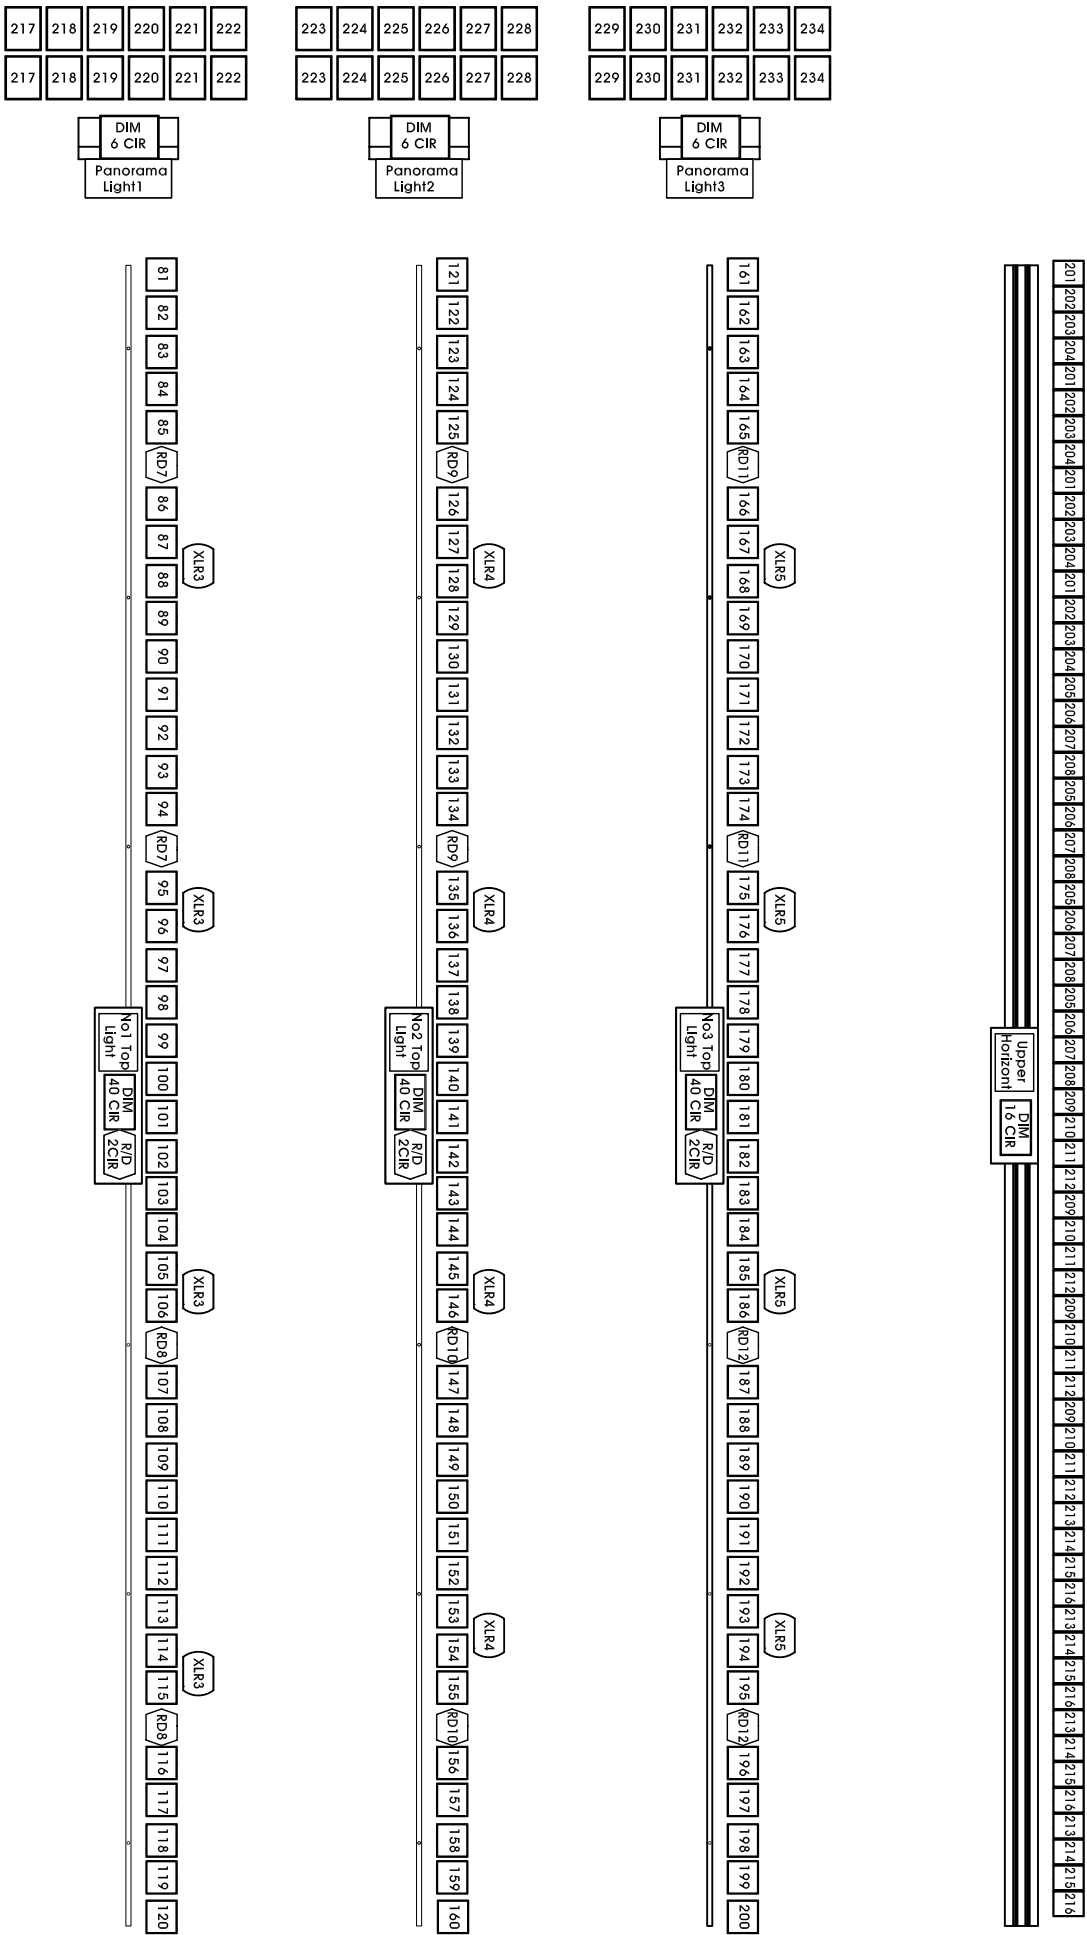

Figure 1 illustrates the experimental design for three different light conditions: Panorama Light4, Light5, and Light6. Each condition involves a light source (Panorama Light4, Light5, or Light6) and a DIM 6 CIR control. The experimental area is divided into two rows of six numbered boxes each. For Light4, the boxes are numbered 235 to 240. For Light5, the boxes are numbered 241 to 246. For Light6, the boxes are numbered 247 to 252. The layout shows the spatial arrangement of the light source, the control, and the numbered boxes.
